

Microsoft 2016 Workshops, Saturday, November 18, 2017

Millbrook High School, Raleigh, NC

Eighteen business teachers joined us for a day of learning about Microsoft Office 2016, sharpening teaching skills to make classes more meaningful for their students, and earning MS certification. Sessions were offered for both Word/PowerPoint and Excel/Access including exciting ways to incorporate student centered activities into their classes each day. Participants also earned renewal CEU credits for participating in the workshop activities. Hank Cox and Meecha Jackson provided the training, and Certiport provided certification vouchers. The majority of the group enjoyed receiving reduced rates for attending the workshop as a benefit of their NCBEA membership. [Workshop Outtake Video #1](#) [Workshop Outtake Video #2](#)
